ECONOMY R & O HYDRAULIC FLUID by Service Pro®

DESCRIPTION: Fleet, Farm and Field Economy R&O Hydraulic Fluid is a blend of highly refined base stocks additized with anti-rust and foam inhibitors for use in industrial general purpose applications calling for normal to moderate service. This fluid can be used in old and new equipment where Anti-Wear properties are not required. Excellent low temperature properties for use in cold climates.

PERFORMANCE BENEFITS:

- Provides a lubricant hydrodynamic film for protection against rust and corrosion.
- Conditions and protects seals from leakage.
- Resists air entrainment and foaming.
- Effective as a heat transfer fluid.

APPLICATIONS:

- Hydraulic Systems on Industrial and Farm Equipment
- Circulating Oil requirements
- Gear Oils without EP requirements

PERFORMANCE CAPABILITIES: General-purpose rust and oxidation inhibited hydraulic fluid used where service requirements are normal to moderate. Consult your owner's manual for recommended Service Level.

TYPICAL PROPERTIES:	ISO Viscosity Grade	ASTM	46
	Specific Gravity at 15.6°C	D 1298	0.919
	Flash Point, °C	D 92	182
	Pour Point, °C	D 97	-34
	Viscosity, cSt at 100°C	D 445	5.7
	Viscosity, cSt at 40°C	D 445	47.4
	Density, pounds per US gallon	D 1250	7.65
